

Gatwick Flagship Chapter

Good Morning everyone - Gary Williams from Hyperlinx Ltd - and we are an internet services company based near Horsham providing all the standard web services:

Web-design, Hosting & domain name registration - a good website speaks a thousand words as does a bad one!

Where we differ from other similar companies is that we specialise in search engine marketing, running many successful campaigns for our client's websites.

With approximately 1.5 million NEW websites being added to the internet DAILY, merely having a website and hoping you get found in the search engines is no longer enough as there is just too much competition out there, and it is growing daily.

Search engines like Google, Yahoo! etc are just like huge online versions of the Yellow Pages - and unless you are running an on-going search engine marketing campaign, your website is being pushed further and further to the back of the list of websites offering similar services.

So the type of referral I'm looking for today is anyone with a website - we can make sure their website gets to the front of the queue and stays there.
That's Hyperlinx Ltd - making your website work for you!!
