

Gatwick Flagship Chapter

Good morning, my name is Kevin Walker and my company is Solar Screen. What is Solar Screen? We are a professional Window Tinting Company that specialises in the application of window films to cars, buildings, houses and conservatories.

If you want to make your Ford Galaxy look like the expensive model with privacy glass, we can replicate that.

If your office is too hot and you cannot see your computer screen, we can film your office windows, reduce the heat by up to 80% and reduce the glare by up to 80% (the film also reduces the dangerous UV's down to less than 5%)

If the glass in your office is old and does not conform to current health & safety regulations, we can "upgrade" your glass by fitting clear safety film.

If your new conservatory is really a new hothouse, we can film the roof and cut the heat by up to 80%.

If your old carpet is looking sad and faded and you worry that the same thing we happen when you replace it, we can fit an optically clear film that stops 99% of Damaging Ultra Violet Light.

So if you have a heat, glare or privacy problem, call Solar Screen.

FOR WHEN THE SUN BECOMES A PANE IN THE GLASS,

PS We Also supply and fit graphics to cars and manifestations to buildings
