NAME: ROGER LYON

COMPANY: RL COMPUTER SOLUTIONS

PLEASE RETURN!

Good morning sales team.

Roger Lyon of RL Computer Solutions provides mobile computer support for the home and small business in the East Grinstead area.

My mobile support service takes the pressure off clients by assessing their issues in the context of their home or business.

With standard problems range from UNT (user needs training) to NNL (network needs love) through to MDOA (machine dead on arrival),

I assess the situation and highlight physical and digital trip hazards.

Upgrading to Windows 10 hit a new extreme this week when my client's computer was damaged beyond repair. I successfully argued his case with the manufacturer who is now replacing the computer for free.

I am looking for clients with small computer installations including shops, accountants and home-based offices who want more than a screwdriver-happy technician.

RL Computer Solutions – support at every step.

Changing the way the world does business
